Hundred Million Deficit in The Federal Budget

New Taxes to Make 29 Million Dollars This Year

Increasing the sales tax from six to eight per cent, corporation income taxes from 19 1/2 to 15 per cent, on consolidated income tax returns, to produce estimated increased revenue of \$29,000,000 Finance Minister Dunning in his budget speech today forecast a total deficit in the current fiscal year of "less than \$100,000,000."

Excise taxes on automobiles are replaced by a flat rate levy of five per cent, regardless of content, of value in excess of \$650 but the tax per automobile may not exceed \$250. All auto mobiles are made dutiable when imported from United States or other intermediate tariff country at a flat rate of 17 1/2 per cent, this replacing the present duty of 17 1/2, 22 1/2 and 30 per cent, according to value.

Duty on farm implements from the United States is reduced from 12 1/2 per cent to 7 1/2 per cent. Before the Canada-United States agreement came into operation Jan. 1, the duty was 25 per cent. It was then cut to 12 1/2 per cent and the new rate of 7 1/2 per cent becomes effective May 2.

The duty on gasoline is reduced to one cent per gallon from the 2 1/2 cents in effect immediately prior to presentation of the budget.

The budget provides that tourists returning from abroad may bring home, free of tax, personal goods up to \$100 in value, providing they have been 48 hours or more absent from Canada and that such exemption shall be given not more often than once in each four month period.

Reduction is made in resp. to 104 items of the customs schedule and there are increases in respect to 12 items.

Council Asked For Option on Building

Were not in Favor But Would Give Co-operation

Town Council was called together Tuesday evening for the purpose of considering a proposition from C. L. Hicks of Calgary who was accompanied by L. N. Laid, w. of Medicine Hat.

Mr. Hicks explained that he was working on a proposition for the establishment of a factory in the province for the manufacture of tin containers for canned goods of various kinds and that he had been in communication with officials of the provincial government who were willing to give encouragement and financial assistance for the manufacture of goods not now produced within the province.

Mr. Hicks asked for an option on the Oranstead building until such time as the company in which he was interested was organized.

The Council did not back favorably upon giving an option as it would tie up the building for some time and that in the mean time they might have an opportunity to locate here.

Medical Examination of School Children

Also Being Vaccinated at the Request of Parents

Acting on instructions from the School Board, Dr. Ward is now giving a thorough medical examination to all public school children in Redcliff. The children will also be vaccinated for measles at the request of the parents.

Information regarding any defects or weaknesses found by the Doctor will be communicated to the parents so that steps may be taken to remedy same.

The expense of these examinations is being borne by the School Board.

This is a splendid move on the part of the Board and parents should be keenly interested in this opportunity to remedy any physical defects in their children.

Redcliff School Puts Anchor on Bullivant Trophy

For Dramatic Events in Grades Six, Seven and Eight

Since our account of the School Festival was written we have learned from Mr. Marsh, President of the Association, that since Redcliff has won the dramatic contest for Grades six, seven and eight for three years in succession, Redcliff will now keep the cup. That is, Mr. Marsh informs us, a replica of the cup has been ordered and will be forwarded to Redcliff school as soon as possible. He also wishes us to state that he regrets having omitted to mention this fact at the Festival concert on Friday evening and to extend his congratulations to Redcliff for its splendid showing for the past three years.

Looks Like Putting Cart Before The Horse

With new taxes introduced by both the Provincial and Federal governments, it looks like more jobs for some and fewer jobs and less spending power for the rest of us.

It appears to us that both governments are putting the cart before the horse in raising taxes before increasing purchasing power and solving the unemployment question as they promised during the election campaign.

A large percentage of the people are finding it difficult to make ends meet with the present low scale of wages and business as it is. It will be still harder for them now that taxes are raised on many lines and wages remain the same.

Mr. and Mrs. A. R. Ballantyne spent last week-end in Calgary visiting friends.

Unity to dispose of it to good advantage.

Council decided however to set prices on several buildings in town which were suitable for certain industries and would co-operate with Mr. Hicks in every possible way to induce any industry to locate here.

Redcliff School Makes Splendid Showing at School Festival Friday

Win Seven First Prizes and 2 Seconds Bring Home 4 Cups, 3 Medals and Two Certificates.

Winning seven First Prizes and two Seconds was the record made by Redcliff School at the district festival held in Medicine Hat last Thursday and Friday. This means our school won four trophies, three medals and two second prizes out of the 18 contests into which our pupils entered. In each of the winning the adjudicator gave great praise to the pupils taking part for the excellent manner in which they rendered their several parts.

Redcliff citizens are proud of the showing made and all are proud in their pride of the interest taken in the festival by both teachers and pupils.

The following events were won by the Redcliff School:— City, Town and Separate schools Dramatization—Grade 1 and 5—Competing for the F. South Trophy, with the play entitled "The Three Fairy Sifts."

Mr. Thorlakson, the adjudicator, remarked on the ease and beauty of the opening scene of the play.

Interpretation was alive and stirred up to a stirring climax, he said. He made special mention of the delightful performance of the little fairy, Annie Phillips, and the airy dancing of Dorothy Birt, who was also a fairy. He also paid a special tribute to Tote Campbell for the splendid way in which she played a quite difficult part for one so young. Others taking part in this play and who played their parts remarkably well were Muriel Rich, Kathleen Cook, Betty Balmer, Aurie Mailand, Don Hargrave, and Billy Blades.

City, Town and Separate School Dramatization—Grades 7 and 8, Competing for the Mayor Bullivant Trophy with the selection "King Midas."

The adjudicator in giving the Redcliff players first place said they had made a splendid opening which at once arrested attention. The King, played by John Walton, was a difficult part which was carried through splendidly to the striking climax. Jack Lien, as the barber, gave a splendid performance as did and who played their parts particularly well as Pan, Florence Bailey as the King's daughter and Agnes Rindahl, who as a mother contrived so much to the signal success of the play.

City, Town and Separate Schools Dramatization, Competing for the Women's Literary Club Trophy—in the selection "Rock Cakes"—Grade 1.

Redcliff won in this event because of better characterization and grouping, the adjudicator said. Little Wilma Pickering was an adorable little cut, upon whom the success of the play largely depended. Her role played a remarkable memory and great self possession in one so tiny and in her first year at school.

Others in the cast who played their parts very well indeed were Ellen Tonks, Alice Shimmin and Joyce Balmer as the three little maids, Elaine Sangster as the hen, Herbert Cope as the butter, Harold Levin as the flour, Ralph Willis as the baking powder, Marie Van Wert as the sugar, Jacqueline McClary and Colleen McKay as the currant twins—and were they sweet enough to eat, and last but not least Ronald Fitzhenry and Virgil Bastien as the cow which created such a burst of fun and applause.

In the solo work Redcliff scored heavily.

In the Rural, Town and Separate Schools Solo for Grades 7 and 8, Competing for the Knights of Columbus Medal in the selection "Linden Lee" May Martin won first place with Agnes Rindahl only one point behind her winning second. Mr. Higgins, the adjudicator, said May had a good wide voice with an easy flow of tone, she had a good sense of pitch, and had a good sense of pitch, and had a good sense of pitch, and had a good sense of pitch.

In Grades 1 and 2 Competing for the Lake of the Woods Milling Co. Medal in the selection "Feeding the Fleck" Jacqueline McClary won first place and Joyce Balmer second. The adjudicator said Jacqueline had excellent facial expression and was true to pitch throughout. Joyce gave a bright performance.

In Grades 5 and 6 Folk Competing for the W. J. Weller Medal with the selection "Come Here to Robin Hood," Gordon Sheasby carried off the honors. Mr. Higgins stated that Gordon had real ability—a good voice which carried conviction. He made a good job of his song using a pleasing melody style.

Once more the Redcliff School chorus, under the able leadership of Miss McWaine, won the S. E. A. E. A. Trophy in the selections "Come over the Brook" and "The Farmer's Boy." The adjudicator said the Redcliff choir had a nice blend of tone and changes of atmosphere were exceptionally well done. The tempo was good throughout and the choir managed to capture the "old English lilt" in the selection.

And so once more the citizens of Redcliff have good reason to be proud of their boys and girls and grateful to the teachers whose hard work and careful training have made it possible for our children to bring such honor to our school and also to our town.

Lucien Maynard, the deputy speaker of the legislature, was appointed to Premier Abernethy's cabinet as "minister without portfolio" assigned to promote the completion of the government's project of issuing "certificates."

Provincial President Visits Vega Lodge

Commemorate Anniversary of Founding of Lodge

Mrs. McCallum of Calgary, President of the Rebekah Assembly of Alberta, paid a visit to the local Vega Rebekah lodge Wednesday night, the occasion being the Widley (founder of the lodge) anniversary proclamation. A large number of "Hat Rebekahs" were present for the event. Following the business meeting the local lodge entertained visiting members and friends at a pleasant social evening. Fifteen tables of progressive whist were played, the honors going to Miss Annie Shaw and Mrs. Anderson (playing as gent) and the consolation to Mrs. Wilson of Calgary and Mrs. Duxbury of Medicine Hat (playing as gent). After cards two long tables were set up and everyone sat down to a bounteous midnight lunch. During the supper hour several short and interesting addresses were given by some of the visiting members, among them being Mrs. McCallum, Mrs. Cann and Mrs. Wilson, all of Calgary, and Miss Jean Gordon, vice-president of the Rebekah Assembly. Mrs. Cope, Mr. Cope, Miss Hunt and Mrs. Rose, all of Medicine Hat, Mrs. T. Jones, Noble Grand of the local lodge, thanked them all for their lovely visit and extended them a hearty invitation to come again.

ETHIOPIAN WAR OVER

Premier Maclellan declared Tuesday "The war is over in Ethiopia is Italian. I announce to the Italian people and to the world that peace is re-established."

Haile Selassie, King of Ethiopia has gathered together all his movable wealth and fled the country of his fathers. The Italian flag flew over the King's palace yesterday, showing that Italy was Ethiopia by right of conquest.

Big Plans Are Now Under Way For Stampede

Will Be Held Here Dominion Day July 1st

Big preparations are now underway for the annual Stampede to be held here on Dominion Day, July 1st.

A number of new events are being added to the program on the grounds and several other attractions are being arranged.

Besides the grounds events the Association is putting on a big carnival which will be opened on the evening of June 30th, and continued on the evening of July 1st, after the events on the grounds are completed.

Among attractions at the carnival will be a Shetland pony which will be given away as a door prize. Everyone who purchases a ticket to the carnival gets a chance of winning the pony. Several other prizes will be awarded during the two big evenings of fun.

At present there is every indication that this year's stampede on July 1st will be the biggest and best yet.

Livestock Men To Organize in Southern Alberta

Ronaldie Holders of Grazing Leases May Join

A number of stockmen from around Medicine Hat met in the city last Friday to discuss some of the problems in this part of the province. It was a very representative gathering of men who are operating in what is called "the short grass country" and after several hours of discussion it was decided to form an association to be known as the Short Grass Stock Growers Association. A committee was appointed to draft articles of association and bylaws, to be presented at a general meeting called for Wednesday, May 27 in Medicine Hat. The body will take in all the territory from the Saskatchewan boundary to the irrigation district. Any one who is a bonafide holder of a grazing lease is entitled to become a member of this association and it is expected that there will be 250 stock growers in the organization meeting on May 27th.

PRIZE FOR ANTELOPE

In the National Championship Competition for big game hunters Geo. Ordway, of Redcliff, has been awarded second prize for his outstanding trophy in the Proportion Antelope class. Mr. Ordway shot his antelope within a few miles of town during the legal hunting season for these animals last fall. The head was sent to New York in competition with a large number of other antelopes from Canada and United States. Besides an association certificate Mr. Ordway also received a cash donation for second prize. The head was mounted and returned to him last week. It is an exceptionally fine specimen of this breed of fleet footed game.

WHAT A CHANCE

FOR FARM & RANCH

We wish we could impress on every reader of this page the possibilities which would follow a five-year plan of building reservoirs and ponds on our farms and ranches where we have now. We always think with pleasure of a morning ride over the Manyberries Range Experimental Station where half a dozen reservoirs, constructed at the cost of a few days' labor, made many watering places where none existed before and where, for the expenditure of half the cost of a small car, one reservoir was constructed to irrigate 60 acres of alfalfa, trees and gardens—about the farm buildings. If that vision could only be caught by all farmers and ranchers in South Alberta what a change could be made on the face of the country side, and what a beneficial change—Lethbridge Herald.

"Black and White"

THERE is a real sense of security in the written word—whether it constitutes a contract, a bargain, or a description of merchandise offered. When you have it "in black and white," there can be no misunderstanding.

This security is always yours when you shop by mail through EATON'S Mail Order Catalogue. Upon its pages, "in black and white" or it may be in beautiful and accurately colored plates, lies the record of the merchandise EATON'S offers you, and to require that they are all we have said of them. Every article in EATON'S Catalogue is accurately described. No claim is made which the merchandise itself will not live up to. The illustrations are faithful representations of the articles.

Shop by mail, at your leisure and in the comfort of your own home, relying on the unqualified statement that "If EATON'S Says It's So—It's So!"

Dwelling Destroyed By Fire at Suffield

Caused by Gas Explosion—Mrs. Nowicki Badly Burned

The residence of Mrs. M. Nowicki at Suffield with all contents was totally destroyed by fire at 1 a.m. last Monday. The outbreak was caused by an explosion of gas.

Mrs. Nowicki was burned about the face and hands and Dr. Gershaw made a hasty trip to Suffield on being called by telephone and took Mrs. Nowicki to Medicine Hat. Mrs. Nowicki is reported to be improving favorably.

Newest Crime Detector

Method Of Photographing Human Voice Has Been Discovered

There is no limit to the aid of science in crime detection. Recent years have brought many wonders of the laboratory for the detective's use, and in the realm of identification we have passed from fingerprints to palm-prints, to ear-prints and many other surprising things.

Now we may be approaching the era of the voice-print, as the result of a device perfected by a Hungarian-born inventor who has lived in London since the day years, just after the war, he went to England as a student in the scientific side of electric engineering.

Edward Wender is his name, and his achievement has been to discover a method of actually photographing the human voice and of developing it on glass so that an indestructible and permanent record of it may be kept.

This method takes the recording of sound a long way ahead of anything done in this field before. There has been the phonograph disc method; there has been the making of a sound track for talking films. But the capturing of sound by these methods has one outstanding disadvantage—repeated use of the records inevitably becomes impaired. Moreover, pure naturalness of tone cannot always be obtained. Individual gradations of voice may be lost or obscured.

These are disadvantages which Mr. Wender's method of photographing the voice overcomes. It is able to take and keep for all time if necessary an absolutely pure record of sound with all its individual variations and characteristics.

He does it by alloying the principles of electricity and light. Subjecting the sound to a lens, he gets a replica of a girl's voice. The subject speaks first into an ordinary microphone. The sound is then carried by a wire amplifier to a big camera of special type and is then photographed on to a plate.

After being developed the voice is printed on to a circular disc of heavy glass in the form of a series of concentric rings, and in this way a record for all the world like some Eastern writing. Each tiny graduation of tone is there, each rise and fall the voice may make without its owner's knowledge. A single word may be represented by a considerable portion of one of the rings.

There may be people whose voices seem similar, but each individual of the human race is better known by experts to possess some peculiarity or individual characteristic in speaking that is possessed by no one else.

The value of a method of recording these peculiarities with complete and lasting accuracy in the field of identification has not been over-estimated itself upon criminologists, and it will soon become an additional part of the most up-to-date crime-fighting equipment.

Crime is verilyighting a long battle when arrayed against science, and this new method of voice identification which produces such marvelous results.

Date With Perfect Square

Alberta Man Found April Ninth

April 9 this year was a day of importance to persons with a mathematical mind because it is a date with a "perfect square," George W. Robertson, of the University of Alberta, reports. Mr. Robertson, after due study, submits the following: 1938 is 44 squared, nine is 3 squared, April is the fourth month which is two squared, April 9 is the ninth day of the year which is 3 squared. This combination will not occur again for 180 years. The next time will be on April 9, 2118, and he says Mr. Robertson's word for it.

Spilled The Effect

Mr. and Mrs. Bibby were entertaining friends. "I think I shall get a car this year," said Mr. Bibby, during a lull in the conversation. "I haven't decided what make, but it's no use getting a cheap one. I suppose I could get a little serviceable affair for two or three thousand."

While the company was gossiping at careless mention of such a sum, the host's youngest son remarked: "And with that little funny little man with the black whiskers and the grey neck, like he did when you bought my lake, dad?"

A farmer's truck stalled in front of an asylum. While he was fixing it an inmate looked over the fence and inquired:

Inmate—What do you do for a living?

Farmer—I'm a farmer. Why?

Inmate—Well, you ought to try being crazy. At sure beats farming.

BRITAIN'S WONDER LINER PUTS OUT TO SEA

The 60,000-ton liner "Queen Mary" successfully left her fitting-out berth on the Clyde for her maiden voyage of fifteen miles to Greenock on Tuesday for scraping and finishing. Crowds lined the banks of the Clyde to watch the giant vessel manoeuvred by eight tugs into mid-stream, and this aerial view of the "Queen Mary" passing down the river shows some of the thousands of people stretched along the banks.

The International Book

Scriptures Have Been Reprinted In 972 Different Languages. The number of languages in which the Bible or some part of it has been published now totals 972, according to an announcement by the American Bible Society.

Among the recent publications of the society is the revised Pongap New Testament and Psalms which will be used in Pongap, the largest of the Caroline Islands. Five nationalities are participating in this project; translated by Germans, printed in England, financed by Americans, distributed by Japanese, and used by Pongapians.

Other scriptures recently published include the Gospels of St. Matthew and St. John in Hindi, one of the many dialects of the Hindi language family. This volume, published by the British and Foreign Bible Society, will be used in Danish Baptist mission work in the Belgian Congo. The new Testament in Monaka and the First Epistle of St. John in Kisi were published on the mission press in West Africa of the Christian and Missionary Alliance.

An analysis of the American Bible Society's records show that of the grand total of 972 languages in which scripture publications have occurred the complete Bible has now been published in 175 languages; the New Testament in 308 additional languages; portions of the Bible, or one complete book, in 514 more, and selections from the Bible, that is, less than a complete book, in still 71 more languages.

By Way Of Contrast

A Canadian from the shores of the mighty St. Lawrence had been visiting relatives in Chawick. Among other wonders of the neighborhood, they showed him the Thames, hoping to impress him.

"Where shall we go to-day?" inquired his uncle of the Canadian one afternoon, as they prepared to go out for a stroll.

"I know," he answered brightly. "Let's go round by the brook!"

On Ontong, Java, copra, or dried coconut meat, is used as money.

New Bullet Perfected

Will Not Cause Poisoning If Eaten By Wild Ducks

Wild ducks suffer from lead marauders as well as from good ones. Shot that falls into the water sinks to the bottom where ducks mistake it for roughage such as gravel or sand. They eat it, die a month or so later of paralysis caused by lead poisoning.

Because they believe that one-third as many ducks die from being poisoned as from being shot by bullets, Professor Robert Chidding Green and Ralph Dowdell of the University of Minnesota set out to save ducks by devising a healthy bullet, and they perfected one. Their bullet, called magnesium alloy, which dissolves within 48 hours after it is eaten, before the lead causes anything worse than indigestion.—Time.

Film Of Pioneer Days

Two Thousand Residents Of Revelstoke District To Appear In Motion Picture.

Some 2,000 Canadians, of the Revelstoke district in British Columbia, are going into motion pictures. It was announced by Gaumont British Films that a number of scenes would be filmed for the filming in that part of the province of a story relating to the building of a transcontinental railway, in Canada's pioneer days.

A number of technicians are already at Revelstoke taking "exterior shots" for the vehicle, in which Richard Arden will star. Arden and the supporting cast are now filming sequences in England. They will sail for the Dominion later.

Friend—"Why have you given the general such a peculiar pose?" Sculptor—"You see, it was started as an equestrian statue, and then the committee found they couldn't afford the horse."

An American actor claims to be able to speak at the rate of two hundred and twenty words a minute. With a little more practice he might become a really efficient French-cleaner salesman.

NEW FRENCH CAR STARKLES PARIS

Frenchmen have to look twice these days before attempting to cruise to the other side of the road because it's difficult, they claim, to find out whether the new 1936 French cars are going or coming. One of the latest, designed by M. Andre Dubouché, shows, with its engine placed at the rear and a tail "fin" at the end of the streamlined body. During trials this car proved 30 per cent faster than a car of the usual design. Gasoline consumption was also lessened considerably.

Wild Flower Protection

Gathering Of Wild Plants Threatens Disappearance Of Many Species

Every province in Canada possesses a rich heritage of native flora. From early spring until cold weather returns in the autumn our woods and glens provide a succession of charming flowers, more varied and beautiful than the best garden produce. Unfortunately many of the citizens, particularly of the larger centres of population, regard this abundance as free gift to be ravished at will. Without thought for the perpetuation of the native stock they descend upon the inviting groves week after week and seem to take pleasure in gathering with reckless abandon the most charming flowers in bloom. It is commencing to be realized that this unrestrained gathering of wild plants is threatening the disappearance of many of the finest of the native species. The Ontario Horticultural Association, conscious of this danger, took steps at their recent convention to arouse a public sentiment towards the protection of the native flora.

The address by the incoming president, J. B. Spencer of Ottawa, was it pointed out that some of the types of the woods have already disappeared and others will follow in their wake unless a more sane attitude possesses the flower pickers who visit the wooded areas from time to time. The fact was disclosed that no less than 25 of the American States have passed laws designed to protect wild plants. Reference was made also to the organization and work of the Wild Flower Preservation Society with headquarters in the United States capital. This organization through its branches carries on its work chiefly by influencing public sentiment by lectures, newspaper articles and poster campaigns. No attempt is made to prevent the picking of wild bloom, which they point out should be done only in a sane and thoughtful manner with due regard for the future. Rules strongly urged that sufficient flowers should be left to form seed, and that plants should not be torn up by the roots. Some species such as the violets, heptacalis and others with flowers arising directly from the roots may be freely picked so long as the plant body is not disturbed. Others, like the Trillium, the newly selected floral emblem of Ontario, should never be gathered freely, as the flower and the stalk, when an unusual prize in the way in which removing all of the foliage and so the death of the plant.

What is needed, Mr. Spencer urged, is the developing of an attitude towards the native flora similar to that which has come to possess the youth of our land towards wild life. Instead of a rush for the roots or the catpaws, when an unusual prize or sentimental appeal, the normal law now takes its place, it was pointed out, in erecting bird houses and nest stations, and in other ways making friends with the feathered and furry visitors which come to stay and remain throughout the year to add so much to the joys of life.

With organized effort this same sentiment can be developed towards the flowers of the fields and the woods.

And Lots Of Exercise

And now the gay suburbanite, Expending his last nickel, Proceeds to carry home at night 1 sack, 1 rake, 1 sickle, 1 garden, 1 well under way. And if he keeps on working 'Till he has on some late summer day 1 best, 1 squash, 1 gherkin.

Woman—All of a sudden my husband kissed the maid! Friend—I wonder what struck him? Woman—I did, with the mug!

Musical Prodigy

Seven-Year-Old Australian Violinist May Startle World

Perry Hart, seven-year-old violinist, will startle the world, in the opinion of many Australian music critics. The girl triumphed at the Sydney Elatedford, winning three prizes in a row against competitors many years her senior. Her parents farm at Bwingdale, usually maintain spot in New South Wales. Seven other children are musical and, self-taught, play either piano, violin or saxophone. Pamela Hart, only two and a half, is already an Elatedford prize winner. Perry could read music before she could talk properly and at four years passed top grade, with honors, the Australian music boards examination.

Major Crop

Wheat To Continue To Be Made Crop Of West, Says Speaker

Wheat will continue to be western Canada's major crop declared Hon. J. G. Taggart, Saskatchewan minister of agriculture, in an address to the annual meeting of the Manitoba branch of the Canadian Manufacturers' Association, at Winnipeg.

Mr. Taggart dealt with general agricultural conditions, drought and soil drifting.

Measures to be adopted in the future, he said, must include a better system of summer fallowing, building and maintenance on the farms of reserves of feed and seed against scarcity, conservation of resources and control of weeds and pests.

Greatest Top Growth

Recent clover produces more top growth in a short period of time than any other legume. When cut, clovers are just right. The fall growth may amount to three-fourths ton to two tons an acre. There is no time so not uncommon in the second year.

In the architecture of eastern Asia, any tower-like structure connected with a temple or serving as a shrine is called a pagoda.

A quest for anyone who really has seen a ghost is on in London.

Alfalfa In Canada

Gives A Larger Yield Per Acre Than Clover Or Timothy

Alfalfa is a forage crop which has been growing in popularity in Canada since the beginning of the present century. The acreage sown to this crop in 1935 was 762,300 and the yield amounted to 1,264,700 tons valued at \$15,743,000. The average price per ton was \$5.04 and the average yield per acre was 2.57 tons. Alfalfa gives a larger production per acre than is obtained from either clover or timothy. It has been grown for many years at the Central Experimental Farm at Ottawa and has been found to outyield any other variety of hay. It usually produces two cuttings in a season and enough aftermath for winter protection. It is a deep-rooted perennial plant, drawing much of its nourishment from the subsoil. Like all other legumes it has the property of enriching the soil with nitrogen gained from the air, and it also produces large quantities of humus through dead leaves and decaying roots. It is of great value as a soil improvement.

The feeding value of alfalfa gives it high rank among all forage crops. All kinds of the crops of alfalfa more than half a million acres are grown in Ontario. Alberta ranks fourth with 75,000 acres, and British Columbia third with 48,000 acres. In Ontario alfalfa is grown under natural precipitation, and the work of the Wild Alfalfa is extensively employed. It is a crop which lends itself particularly to livestock-raising communities specializing in the dairy industry.

Was Interesting Figure

Originator Of Customs Was Once Mistaken For King Edward VII

The death of Willie Clarkson revealed a man who was one of the most interesting figures in London's life, writes "An Old Friend" in the London Observer.

He was known as "wig-maker" and famous as an impersonator and originator of costumes, he became a social personality who was never absent from first night and was in demand at the most important social functions.

He deliberately dressed to make himself a character, and used to allow his hair and beard to grow in fantastic shapes. Whenever he went he selected some appropriate accoutrement which set off his handsome features and imposing manner. He was known as "wig-maker" and famous as an impersonator and originator of costumes, he became a social personality who was never absent from first night and was in demand at the most important social functions.

Interesting Local Items

Friends of Mrs. A. McFadden will regret to learn that she is confined to her bed suffering from an attack of pneumonia.

After a few days of cold and threatening weather, conditions have changed and we are again enjoying our usual sunny days.

Mr. and Mrs. Anderson and small son of Calgary, who were motoring to Winnipeg were the guests of Mr. and Mrs. J. C. Hoogveld on Saturday evening.

Mrs. H. Cann and Mrs. Wilson of Calgary motored down last Wednesday to attend the Rebekah meeting here same evening. They spent several days in town the guests of Mr. and Mrs. F. Cann.

Work is progressing quickly on the new tennis court which is being located on Broadway. When completed it should make a fine lively court as it is to be covered with a coating of asphalt.

Newspapers are classed as necessities of life with bread, milk, water, electricity and some other items, which are exempted from the two per cent sales tax imposed by the Social Credit government on all retail transactions in Alberta on May 1st.

A very successful sale of work and home cooking was held in St. Ambrose parish hall last Wednesday afternoon by the St. W. A. Tea was served and a large crowd was present. The winner of the pair of pillow slips was Mrs. H. Bardell.

The town staff is gradually setting the water connections to houses repaired. The cold weather of the past winter did considerable damage and put householders to a long spell of inconvenience but the damage is being remedied as quickly as possible.

Word has been received from Owen Sound, announcing the death of C. E. Munroe, a former resident of Redcliff, who, while here, was employed as an expert mechanical engineer at the Rolling Mills. Deceased, who was 76 years of age was one of the officials who took part at the laying of the cornerstone of Gordon Memorial Church.

The local post office is now undergoing spring cleaning operations. The interior is being painted and varnished.

Mr. and Mrs. C. L. Hicks returned to Calgary yesterday after spending a week here with Mrs. E. Hicks.

A number of the local Boy Scouts are going to Medicine Hat tonight to see some interesting moving pictures to be shown in Fifth Ave. Church.

Mr. G. H. Worts has given his Broadway meat market a real spring cleaning and renovating. Improvements have also been made in the refrigeration and other fixtures and the shop now presents a very up-to-date appearance.

Arbor Day was fittingly observed at the school grounds last Monday. A number of trees were planted around the grounds under the supervision of Trustee H. Johnson who was ably assisted by the older boys. The grounds were also, nicely cleaned up by the pupils. There is now a big improvement in the appearance of the school property.
